NPIC/R-275/64

This report supplements NPIC R-116/64, 1/ which discusses the Zhitomir MRBM Complex, consisting of three Type II launch areas, together with a probable rail-to-road transfer point.

25X1D The Zhitomir Fixed Field Site is located in a flat and thickly wooded plot approximately 6.5 nautical miles (nm) west-southwest of Berdichev in the Ukrainian SSR. (Figure 1). The earliest photographic coverage of the site was in [REDACTED] but the configuration was not identified as a completed field-type site until [REDACTED]

25X1D Launch Areas No 1 and 3 were first observed in [REDACTED] and were considered completed in [REDACTED] respectively. Launch Area No 2 was considered completed when first observed in [REDACTED]

25X1D Launch Area No 1 is located 14.6 nm north-

northwest of the field site and Launch Area No 2 is situated 19.5 nm north-northwest of the field site. Launch Area No 3 is located 14.4 nm to the north of the field site. Launch Areas No 1, 2, and 3 are oriented on azimuths of 220 degrees.

A probable rail-to-road transfer point for Launch Areas No 1, 2, and 3 is at Chudnov rail yard, 14.6 nm northwest of the field site. The railroad yards at Berdichev probably are utilized by the field site. An improved road leads from the railroad yards to the field site via the Berdichev Airfield.

The fixed field site (Figure 2) consists of a looped road pattern with two parallel launch clearings integral with the roads. The launch clearings are on an azimuth of 220 degrees and are spaced approximately 550 feet apart. No equipment or supporting facilities are evident at the field site.
